

The M3.48-105 R10k2 is a 5-digit display for length/level measurement using resistors up to 100 kOhm and a visual limit value monitoring via the display. The configuration is done via three front keys or via_x000D_optional PC software. Optionally, an analog output, a digital input and 2 switching points are available. A direct limit value adjustment in operating mode and selectable software functions complete the device concept.

Technical data			
Article no.	70004-1789	Width × height	48 x 24 mm
Measuring input	1kΩ; 10kΩ	Pulse output	No
Display digits	5	Power supply	24DC
Digit height	10 mm	EAN	9501337353667
